

Control the fluid level of your tank
from your smartphone.

Configure and receive automatic
alarms to your email.

With the Dolphin system it is possible to measure the fluid of your tank and automatically send the reading to the web site www.dieselplus.net or your smartphone with the "DieselPlus Tanks" App.

- ✓ Easy gauge installation because its compact building
- ✓ Economical as its operation has not any wear or does not need any maintenance

-  Level reading
-  Alarm configuration
-  Alarm history
-  Data export

Telematic level reading from your PC or smartphone

DOLPHIN GPRS	258200300
DOLPHIN D+ ANNUAL LICENCE	670800500

APPLICATION

- To make the periodical measurement of the fluid level in a tank.
- To consult the fluid levels through the web site www.dieselplus.net or the «DieselPlus Tanks» App available for Android and IOs.
- To configure automatic level alarms in your email: filling alarm, minimum level alarm, maximum level alarm, unregular empty alarm, etc.
- Compatible fluids: any fluid with the fire point >40°

ADVANTAGES

- Its compact design with internal battery allows an easy and quick installation, without any external power supply.
- Replaceable battery · 4-year estimated life

TECHNICAL FEATURES

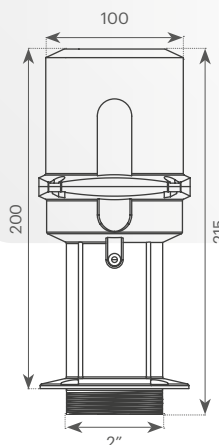

Measurement range	100-4000 mm
Working temperature	-10 °C a +50 °C
Connectivity	GPRS
Reading frequency	1 transmission per hour
Power supply	3.6 V lithium battery
Battery autonomy	4 years* (easy user-replacing) *1 transmission per hour at 25 °C
Reading resolution	5 mm
Accuracy	± 1% mm (in the level tank height)
Installation	2" M thread or 4-screw fixation For a correct accuracy it is required the installation of a PVC tube of Ø50 mm.
Protection	IP-65

0,48 kg

100x100x215 mm

0,40 kg

CONNECTIVITY

Without cables. Consult the data in the web site www.dieselplus.net or the «DieselPlus Tanks» App installed in your smartphone.

DieselPlus allows:

- The reading of the tank level
- Multiaccess from different devices
- Automatic data reception of the tank state in your email
- Minimum level alarms
- Maximum level alarms
- Filling alarms
- Level drop alarms
- Alarm history
- Data export in *.csv or *.txt format
- Grouping the tanks by zones, installations, ...
- Making a register of inputs by supplier, cost, amount, ...
- Having a supplier register
